

Model Number

| Product name | | Specifications Model | Full quantity | Remark | |
|---------------------|-----------------------|----------------------|---------------|------------------------|---|
| DC distribution box | Box | 550X500X180mm | | Dual input | |
| | Input switch | Fuse | 160A | 2 | Shanghai Ceramic Electric, Xi'an Fuse Factory |
| | Output switch | Fuse | 63A | 4 | Shanghai Ceramic Electric, Xi'an Fuse Factory |
| | | Fuse | 32A | 4 | Shanghai Ceramic Electric, Xi'an Fuse Factory |
| | Power indicator light | 220V Φ 22 | 1 | Chint, double material | |

Product Features

1. Rainproof design with waterproof grade IP43, installed outdoors to avoid rain and water ingress;
2. Single-door closed rice gold chassis, sturdy and reliable, simple and beautiful, surface electrostatic epoxy spray;
3. Standardized design, flexible configuration, convenient, reliable and beautiful internal wiring;
4. Convenient construction and maintenance: centralized inlet and outlet management and full front operation;
5. Clear and firm identification numbers and signs;
6. 220V AC power sockets can be provided for lighting and testing;
7. The power load can be measured and compared with the total meter value, and it can be installed uniformly in the box to avoid the inconvenience caused by the installation of additional new meters;
8. It has lightning protection and surge overvoltage protection functions, which can play an important protective function for the back-end power equipment.

Application

The products are widely used in the distribution and management of indoor DC power supply in communication rooms, providing DC power supply for communication equipment in the room. Well-known brand circuit breakers (ABB, Schneider, Chint, etc.) or high-quality fuses are used internally, with reliable quality.
